CLEAN AIR AND SUSTAINABILITY DIVISION

Hot Issues:

Limetree Bay Terminals: On December 28, 2018, CASD issued a Plantwide Applicability Limit (PAL) application completeness determination to LBT. Barring unexpected challenges during the public comment period, EPA will issue the PAL permit 12 months from this date. The permit will provide operational flexibility to LBT. At the LBT site, the modular village for workers is now open and workers have started moving in to begin reopening activities for the refinery. LBT is about to complete demolition of the #2 Beavon unit to comply with the emission reduction requirements in its CD.

To ensure that we are on schedule, the Air Programs Branch contacted LBT's consultants for this permit application regarding the status of the modeling protocol that will be used to perform the environmental justice analysis. Although we originally alerted the consultants about the EJ protocol in November 2018, they indicated that they have not been able to work on it yet and that they should be able to give us a better estimate in about 3 weeks. CASD is setting up a briefing for the RA to discuss the schedule and next steps. ORC, DECA and CEPD will be included in the briefing.
